Brief description:

Transport box for eight CAMEO PIXBAR® G2

Description text

A transport box (flight case) must be supplied in the usual truck size grid 120 × 60. The flight case must be able to hold eight PIXBAR® G2 lights, including, at a minimum, the following accessories: 10× stack/hanging kit, 4× Verti-Mount, 4× M20 adapter, 8× aperture, and 16× filter. The flight case must be able to be opened at the top with a lid, and the lid must remain open when opened using a lid lock with click-stop function. The lid must be able to be closed with standard flight case butterfly fasteners. The bottom of the case must be reinforced to accommodate four swivel castors fitted with 100 mm solid rubber wheels, two of which must feature brakes at the front (side of the open flap). There must be a recess in the lid to hold a tour label. There must be four recesses in the lid for stacking identical cases with castors. The eight PIXBAR® G2 lights must be able to be securely stored in a shockproof holder designed to fit the lights. There must be two large folding handles on all sides for carrying the case. The aforelisted accessories must be storable in a removable carrying tray, mounted above the lights. The tray should include foam guides to ensure safe transport and scratch-free storage.

Case walls: Poplar-eucalyptus multiplex board
Colour: Black
Dimensions: ≤ 1,200 × 600 mm
