Please note that this list is not complete and will be updated over time. Last Update 02.2023

For countries not included in the list above: please contact the relevant authorities and inform yourselves about the permitted frequency ranges for your country.

We do not give any guarantee for the correctness or completeness of the information. We assume no responsibility for external links.

*1 - 534-542 not available in Hainaut

*2 - In Portugal, only use of transmitting microphones in sub-bands 470-734 MHz and 742-786 MHz in R. A. Madeira is allowed. And 470-750 MHz and 758-786 MHz on the Continent. = Effective radiated power

*3 - Licence exemption. Geographical restrictions for the sharing usage with the TV Broadcasting. It is needed to contact the National Spectrum Management Authority.

*4 - Wireless audio devices are permitted to operate in New Zealand between the frequencies of 510 MHz and 606 MHz and between 622 MHz and 698 MHz, under class licence provisions which limit maximum e.i.r.p. to 250 mW and can operate on blocks used by DTV on the "no interference - no protection" basis.

*5 - Due to the situation in Ukraine (russian war of aggression), not all data could not be verified in November 2022.

Free	= licence exempt
No	= frequency unavailable
Yes	= license required
